dear john and madeleine
charles was well taken care by a competent surgeon but the tumor had already locally invaded the cavity therefore metastasis was expected to occur early and indeed it did
charles did not suffer physically but obviously he was aware soon that it was the end

hope to see you sometimes how are you doing in woodshole
anne and myself are going to visit briefly jordan in november together with the weston funny since jim weston sold his car to charles while he was in your lab
best wishes
