Dear Sir or Madam:

I am writing to ask whether you could furnish or lead me to a source of a portrait of Wilhelm Thierry Preyer (1841-1897). Preyer, a physiologist, was born in Manchester, England, but lived all his professional life in Jena and Wiesbaden, Germany. He published books (German language) on biochemistry, blood circulation, breathing, muscular physiology, and fetal physiology.

I am editing a series of volumes on prenatal ontogeny, the first of which will be dedicated to Preyer, so I would like very much to have a portrait of Preyer for the frontispiece of volume 1. Any help you can extend would be greatly appreciated.

Sincerely,

Gilbert Gottlieb

Viktor:

Thanks for your suggestions on the title of the prenatal book. Thinking about shortening to "Prenatal Ontogeny of ~~Behavior~~ and the NS," vol. 1.

~~Hope~~ Know you agree with above. Any suggestions? Gilbert
