April 19, 1976

Professor Viktor Hamburger  
Department of Biology  
Washington University  
St. Louis, Missouri 63130

Dear Viktor:

Your letter of April 13 arrived just as I was about to dictate the following:

There will be a public announcement in due course, but I thought you should be one of the first to know that before the close of 1976, I will be relinquishing the directorship of this Department to move to Woods Hole where I will be the first full-time residential President and Director in the 89 year history of the Marine Biological Laboratory.

After nearly 21 years in this Department, I still think of myself as a developmental biologist. I hope, in fact, over the next decade to develop a new center for the study of the "reproductive ecology" and developmental genetics of marine organisms. At the same time, I am becoming increasingly interested in the development of institutions.

For nearly 21 years I have enjoyed a degree of freedom and level of support that is almost unmatched anywhere in the world. Leaving will be a difficult, indeed heartwrenching experience. I am confident, however, that the Staff Members of this Department will continue to be creative without me, and I devoutly hope that in my new role, I, too, can continue to serve the Nation effectively.

Now that I have that off of my chest, let me turn to the questions raised in your letter.

Helen Willier's address is simply Bigfork, Montana 59911. Alma and I have been hearing from her from time to time, and to the best of my knowledge, she is well and happy. I will write to her, as you suggest, inquiring whether she received your letter and suggesting (very gently) that you would like very much to hear from her.

I have in my possession all of Benjie's critical correspondence in three or four file drawers. The material was drawn upon by Watson in

preparing his memoir. Unfortunately, there is very little in it of a personal nature covering Benjie's early years. I will have this material only a few months, possibly only until mid-June when I intend to deposit it at the Johns Hopkins University library. It is at your disposal, of course, and if you could possibly find a way of coming to spend a day, we would be delighted to see you.

I do hope that I will be here when you call this week. I intend to be in the laboratory on the 19th and 20th, but I will be leaving for the American Philosophical Society meetings on the 21st.

Your letter was the first I had heard of Ernst Hadorn's death on April 4. I am distressed. I had spent a number of hours with Ernst at a meeting in Martinique January 25-30. He did not look well, but his comments and questions at the conference came out booming and critical as always. I will miss him.

With every good wish,

Yours sincerely,

A handwritten signature in dark ink, appearing to be 'J. Ebert', written in a cursive style. The signature is positioned above the typed name 'James D. Ebert'.

James D. Ebert
