St. Louis, Mo. 63130

Dear Dr. Hamburger:

Enclosed is my Biographical Sketch for your grant application. I am afraid there is not much on it at this point. I left blank the space "Role in Proposed Project" because I am not sure what response is appropriate. Would you please fill it in? Also, I have indicated None under "Research Support" because I have no individual grant. However, I am currently being supported, both tuition and stipend, on a NIH Training Grant GM-00929. I do not know whether that information is supposed to be included or not.

I am working on a description of my research for you but will send it separately so not to delay this letter.

Yours truly,

Peggy Hollyday
Margaret A. Hollyday
