Trink,

You have e-mail!!! That's great. I will pass out your address to the whole lab. You will probably get a lot of mail

Yes, I have read that most excellent letter. I have been thinking about it. I am trying to figure out when and how.

As you will probably see from my address below, I am now Chair of the Biology Department.

I know. I am an idiot! You told me never to do stuff like this. However, if I didn't, a total shit might have done it! In fact, one was in line and expecting the job when I snatched up the job! Actually, it took some convincing, and it seriously was a matter of doing it right versus letting someone else mess it up. I may not get much done, but I got a better shot at it than the alternatives.

I am managing to do experiments, run the lab, and run the Department. It is busy, but I am getting the hang of it. I will get the Department on its feet and then resign, go back to the lab full time.

I will call you about doing the book after I talk to Annie some more about it.

That will be soon. I want to find out how you folks are doing and also how things are back in Kline Biology Tower.

Love, Ray
