Dear Trink,

Sorry you won't be at Tokyo. I am afraid it is not going to be a madly exciting meeting, though I greatly look forward to distinguishing one Japanese from another in the field of cell movement - as you say, there are some very good people.

I will be coming almost straight from Tokyo to Uppsala and it will be very good to see you again. I didn't know you had back trouble, but then 50% of the civilised world has. I can hold out an ambiguous ray of hope to you : as one really gets old, it fades away. But one has to be properly senescent.

Many thanks for the preprints, very good reading as usual.

Regards,

Michael
