During figure production, an error was introduced in Figs. 2d–h and 3 of the abovementioned paper: the color-coding of stations CAA4 and CAA6 in the original publication was incorrect. The corrected figures can be found below.
Figure 2. Vertical distributions of (a) practical salinity, (b) temperature, (c) density, (d) AT, (e) Ba, (f) δ18O, (g) DIC, and (h) normalized DIC (DIC$_{norm}$) observed at stations CAA1 to CAA7 throughout the CAA.

Figure 3. (a) $^{226}$Ra, (b) $^{228}$Ra, and (c) $^{228}$Ra/$^{226}$Ra profiles ranging from the surface to depth for stations CAA1 to CAA7 (where pink dots indicate station CAA2, which was only sampled at the surface and bottom) throughout the Canadian Arctic Archipelago.
