**ABSTRACT:** The Japan Marine Science and Technology Center operates several databases. Various people utilize “Deep Seafloor Image Database”, “Research Result Database”, and “Patent Information” from our homepage. By entering keywords into the “Deep Seafloor Image Database”, it is possible to search for images obtained by JAMSTEC research vehicles and submersibles. In the “Research Result Database” it is possible to use keywords to search for papers and conference presentations by JAMSTEC researchers. “Patent Information” provides access to patent information available at JAMSTEC. By clicking on the name of the patent in the list, it is possible to get a PDF file of the contents of the patent.
