

Digitizing and Making Accessible the Marine Science Journal, Contributions in Marine Science

Liz DeHart

University of Texas Marine Science Institute

Contributions in Marine Science

Introduction

The University of Texas Marine Science Institute is considered the oldest and most significant marine research facility on the Texas coast. It has published its own scientific journal, *Contributions in Marine Science*, providing institutions all over the world with important data and research since 1945. The journal is currently not available online to the marine community.

Objectives

- Improve access to valuable collection for worldwide community
- Transform back issues to digital format, OA
- Preserve institute's valuable research
- Share collection with other repositories & services
- Develop model for other digitization projects
- Provide a tool for online publishing using Online Journal Systems (OJS) through Texas Digital Library
