

**DIGITAL LIBRARY: ACCESS SYSTEM FOR THESES, ARTICLES, AND
BOOKS PUBLISHED BY CIBNOR STUDENTS AND RESEARCHERS**

María Esther Ojeda Castro

CIBNOR (Centro de Investigaciones Biológicas del Noroeste)
meojeda@cibnor.mx

ABSTRACT: A main objective of the CIBNOR library is to expand available resources and existing services via the Internet. By allowing access to the collection of theses by graduates of our postgraduate program, and books and scientific research articles published by researchers, CIBNOR can benefit from the royalties. CIBNOR initially intends to digitize 172 master's and doctor's theses, as well as 29 books published by CIBNOR on subjects from aquaculture, biotechnology marine biology and ecology of arid areas, among others. The purpose of the project is to make the digital collection, result of years of research at the Center, available to students, researchers, national and international organizations and the general public.
