Figure S1. $^{137}$Cs activity plots (in dpm/g) of cores from the (a) lower delta (LD; n=2), (b) middle delta (MD; n=5), and (c) upper delta (UD; n=3). The peak of $^{137}$Cs is found at 1964 A.D. and the onset of $^{137}$Cs is at 1951 A.D.
