Seal Whiskers Vibrate Over Broad Frequencies During Hydrodynamic Tracking

Christin T. Murphy*[1,2], Colleen Reichmuth[3], William C. Eberhardt[4] , Benton H. Calhoun[5] and David A. Mann[6]

Supplementary Video Legends:

S1. Overhead video footage of the seal freely swimming
S2. Overhead video footage of the seal following the hydrodynamic disturbance from a sphere
S3. Overhead video footage of the seal following the hydrodynamic disturbance from a radio-controlled model submarine
