Dr. Ballard,

Please accept this sweat shirt on behalf of millions of people who feel as I do about raising the RMS Titanic. The logo speaks for itself and in no way intends to tarnish what your expedition is all about. Just a week ago the U.S. patent office accepted my request to patent this logo. I want you to know that my intentions are not of a money making venture, but of a feeling I have that I have expressed in a longer lasting way than just talk. Like everyone else, I've been fascinated about the story of the sinking of the Titanic and now that it's been found I believe it should be left as a memorial to those who are still down there, their families, and to the few survivors of the sinking who are still alive. I feel attempts to raise the super-liner would "desecrate the final resting place of so many people and their memory. I hope the sweat shirts, T shirts, will become popular as the arguments grow over the Titanic's future continues. I don't expect to return on the sales of these items. It's just my way of trying to preserve a piece of history.

Thank You God Bless  
R Finn.

P.S. I Hope Shirt is RIGHT SIZE!
