

Sept. 14, 1957

Dear Trink,

I've made it to Med. School and am really happy here. I am ~~ex-~~pecting to rack up top marks in Anatomy, Histology and embryology. A cadaver ought to be easier than those cats were. More room to move around in. Maybe I'll even find the Sartorius muscle in the legs. Wouldn't Ted Brown be surprised.

I wish you and your fine family well. I am keeping house in an apt - with two others. Good fun. I will be married next June -

Thanks for all you've done - Respectfully, Bill S.
