

Kyoto, Feb., 26, 1963

Dear Prof. Hamburger:

Many thanks for your kind letter dated Feb. 2nd. I am very sorry for not having replied to it sooner, for which I hope you will forgive. Indeed it is the busiest season now; As the end of the fiscal year of the universities in this country is drawing near, there are so many businesses around me. But the main reason of the delay in writing to you may be that I felt it as a hard task to express my heartiest thanks for your kindness in my poor English! In any way, I must confess my gratitude for your kindness of making such an excellent suggestion and arrangement for my visiting USA.

I myself am, of course, convinced that it must be very profitable if I could attend the Embryology Congress and work in Dr. Ebert's Laboratory. I will write and tell him my wish to apply for the Fellowship.

My research group is ~~very~~ very expanding. Recently, I have been successful to get a very good staff in my group, who has been an immunogeneticist with good training on tissue culture and biochemistry. From this spring on four new research students will join to work in my group.

Many many thanks again for your kindness

With cordial greetings

Johns Okada
