

THE BIOLOGICAL LABORATORY.
VASSAR COLLEGE.
POUGHKEEPSIE, N.Y.

March 19th 1900

Dr. C^m R. Harper

President of the University of Chicago.

My Dear Dr. Harper

I received to-day notice of my appointment by the Board of Trustees and also your kind letter of reassurance as to the classes in it concerning the amount of ~~work~~ ^{teaching} which may be required. I am satisfied to have the matter in your hands. But I would like to make sure that a "double major" satisfies the University requirement of ^{regular} "two" courses. That is my understanding, though I shall offer, in addition to a double major each semester in the Senior college, research

work in conjunction with the head of the
Department. You see I am not anxious
to come as close to the minimum as
possible, but to give the University the
best results of my services.

Yours very truly
Frank R. Lillie.
