*Dr* LEONARD CARMICHAEL  
VICE PRESIDENT FOR RESEARCH AND EXPLORATION

September 18, 1972

Dr. Viktor Hamburger  
Department of Biology  
Washington University  
St. Louis, Missouri 63130

Dear Dr. Hamburger:

I have just written, at the request of an editor, a very general statement about some aspects of my old work on the development of behavior.

You will see on the page that I have xeroxed references to two of your publications. Citation # 35 is : "Some aspects of the embryology of behavior." Quart. Rev. Biol., 38:342, 1963, and citation # 36 is: (with R. Oppenheim) "Prehatching motility and hatching behavior in the chick." J. exp. Zool., 166: 171, 1967.

Would you prefer to have me cite any other works instead of these two?

May I take this opportunity to send very best personal greetings.

Sincerely,

*Leonard*

Leonard Carmichael
