Re: Summer Schedule

This is to bring you up-to-date on where things stand for the coming summer. As you can see, the lecture schedule is not yet complete. I hope to finish it up by the end of the third week in April. The Course has been funded for the next five years, so serious financial problems won't occur for some time. Unfortunately, funds for student support are too low. I have found it necessary to cut out tuition support for the post-Course period, although stipends will continue to be paid for the full summer. Antone Jacobson has resigned, and Trinkaus has agreed to run the Teleosts section as a Special Lecturer, in much the same way that Ray Rappaport has done Cytokinesis in the Course in recent years. Eric Davidson will join the staff on July 1. Robert Briggs will be a Guest Instructor in the Course for the week beginning June 28; Johannes Holtfreter will be with us in the same capacity from July 14 through the end of that week; and Viktor Hamburger will be with us, also as a Visiting Instructor, from July 20 for a period of about four days.

Regards!
